Maintenance tip!

Dry air is an essential tool for maintaining the efficiency and longevity of your handpieces and small equipment.

Moisture can cause internal corrosion, rust, and mildew, leading to malfunctions and premature wear. Using a dry air system can help to prevent these issues and help to ensure that delicate components like bearings are not damaged by water as well as help cleaning powder in air polishers from clumping. Ensuring that proper drying is done after sterilization will also help prevent trapped moisture from causing internal damage.

ULTIMATE BASE240

LED Curing Light

NEW

Only
£475

A Curing Light that brings a uniform beam for a better curing effect

- 29 blue and violet LED chips arranged in a mixed and interleaved pattern blends uniformly to help prevent uneven spots and dark areas
- Uniform beam promotes complete photo initiator reaction within the resin, enhancing curing effectiveness
- **FOCUSED LIGHT OUTPUT** with light angle of only 10.8° delivers improved penetration

Less heat for gentle care

- New pulsed output mode provides **LESS** heat which ensures the curing depth of ≥3mm in just 5 seconds, the temperature is significantly lower compared to the constant output of STD heat.

Light intensity up to 3000mW/cm²

- High light intensity and less light loss bring you sufficient curing depth, which can reduce the curing time and greatly improve the efficiency of resin curing

Wide spectrum Curing Light

- Wavelength range of 385-515nm makes the Ultimate BASE240 Curing light suitable for effective curing of all resins on the market

7 Working modes for clinical versatility

- The Ultimate BASE240 offers robust performance, which is well-controlled and can fully meet various clinical needs
Normal / High / Turbo / Ortho / Soft / Pulse / Check

OPTIMA EndoActivE+

Ultrasonic Endo Activator Device BAE320

- Ergonomic & comfortable design
- Three Power Levels
- Four Time Modes
- Highly Functional design = more efficient irrigation
- Wireless Control, user-friendly operation
- Clear LCD screen for easier observation
- Ring Switch control button
- Stable performance - appropriate vibration amplitude ensures consistent stable reading

NEW

£375

OPTIMA Apex Locator

Accurate

- Accuracy rate to 97.71%
- Multi-frequency apical positioning technology is capable of accurate measurement even in the presence of blood or residual pulp in the root canal

Simple

- Clear bright LCD display
- Clear sound with intermittent beeping at different frequency depending on the position of the apex

Apical Stop Setting

- The apical stop alarm function position can be adjusted freely according to clinical needs

£219

Contents included:

2 x file clip
2 x lip hook
1 x touch probe
1 x calibration tester
All accessories are autoclavable

OPTIMA GE+ Obturation Gun Unit (BAE340)

- Quick heating within 15 SECONDS - reduces time for waiting and increases work efficiency.
- 360 degree rotatable injection needle - rotates freely to facilitate multi-angle filling
- 0.5 mm injection needle - easy to reach the apical 3mm of canal brings better filling
- Dual screen display - unique double displays design enables convenient operations in different angles and teeth positions

£499

NEW

Contents included:

Obturation gun unit
Charging base & standard configuration needles sizes:
23G 24mm x1, 23G 28mm

Optima E+ BAE380R

Brushless endodontic motor with integrated apex locator

- 6:1, 360° rotatable contra-angle head
- Compatible with most common file systems, incl. EdgeEndo
- "SGP" Safety Glide Path (reciprocation) mode
- Various preset modes and memory programs available
- Speed: 100-2500 rpm; torque: 0.4Ncm-5.0Ncm
- Small head diameter (8mm) and height (9.7mm): more visibility during operation
- Smooth rotation and lower noise for patient comfort
- Easy to read OLED Display
- Integrated contra-angle
- Wireless charging

£899

OPTIMA BAC300

Ultrasonic Scaler

NEW

Starting
from
£499

Comprehensive Ultrasonic Scaling

- Three versatile modules: G, P, and E (General, Periodontal and Endodontic) with five key functions: supragingival scaling, periodontal treatment, endodontic treatment, restoration preparation, and implant maintenance angles and teeth positions

Intelligence Touch System

- Precision Control with Intuitive Touch Interface, 12-level power adjustment to suit a wide range of clinical needs
- Ultra-sensitive, waterproof touch panel allows seamless performance even when used with gloves, water, or protective film

Wide-Range Frequency Control

- Compatible with both titanium and stainless steel tips
- Adjustable vibration amplitude from 1–200µm
- Ergonomically engineered for maximum comfort

High performance Handpiece

- Integrated LED lighting provides optimal visibility, autoclavable design with advanced sealing technology ensures safe sterilization and helps prevent cross-contamination

Automatic Water Supply System

- Plug-and-play design with a 600mL water reservoir
- Clear volume markings enable easy monitoring of water levels
- Compatible with distilled water and 5% sodium hypochlorite solution

Intelligent Automatic Power Adjustment System

- Automatically adjusts power output based on the hardness of dental calculus, helps to ensure stable, efficient scaling
